REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the closest prior art of Fritz et al. (US 2002/0120216), Kirk et al. (US 4,860,740), Teo et al. (US 6,540,763), and Burns (US 4,616,649) will be discussed. Fritz and Teo each discloses the claimed invention substantially (see fig. 1a, 1b of Fritz; see figs. 9, 12, 13 of Teo) but fails to disclose or fairly suggest undulating resilient webs that have forward free ends that are spaced from abutment surfaces in the casing in the cocked position and engage the abutment surfaces in the casing on movement towards the advanced position. Kirk et al. teaches undulating resilient webs (40) that serve as a return spring for a medical device but fails to disclose or fairly suggest the claimed free ends spaced from abutment surfaces. Burns teaches resilient webs (22, 24) with free ends prior to their engagement with an abutment surface but does not teach them in combination with the remaining claimed elements and there is nothing in the disclosure of Burns that would have made the incorporation of free ends into a return spring of Fritz, Kirk, or Teo obvious to one skilled in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
